

# JohnsonDiversey Tego 2001

## Amphoteric Disinfectant

### Description

**Tego 2001** is a concentrated, microbiocidal formulation, for the disinfection of surfaces in the food and beverage processing and allied industries and in pharmaceutical and cosmetic manufacture. **Tego 2001** is a surface active, microbiocidal amphoteric system, based on 1-alkyl-1,5-diazapetane in aqueous solution.

### Key properties

- Use for the disinfection of pre-cleaned walls, floors, work surfaces, conveyors and equipment.
- Can be applied as a spray or by means of a clean mop, cloth or sponge.
- Small items, or dismantled equipment, may be cleaned and immersed in a **Tego 2001** solution.
- **Tego 2001** is ideal for low temperature production areas as it maintains its efficacy even at 10°C
- **Tego 2001** can be used for fogging
- **Tego 2001** has retailer approval for use in high care food production factories

### Use instructions

**Tego 2001** is normally used as a 1.0% v/v aqueous solution (50ml in 5L of water) at temperatures up to 50°C. For fogging use **Tego 2001** as a 1-2% solution at approximately 1L per 100m<sup>3</sup> air space.

### Technical data

Appearance	Pale yellow liquid
pH	9.3 - 10.3
COD level	408mg O <sub>2</sub> /g

The above data is typical of normal production and should not be taken as a specification.

### Safe handling and storage information

This product is irritant and there is a risk of serious damage to eyes. Avoid contact with skin and eyes. Keep in original container, tightly closed. Protect from frost

**Tego 2001** has a shelf life of 3 years

**DO NOT MIX TEGO 2001 WITH OTHER CHEMICALS.**

Full guidance on the handling and disposal of this product is provided in a separate Material Safety Data Sheet.

### Product compatibility

Application solutions, when used as directed, will not affect materials normally encountered in the aforementioned industries.

### Approvals

**Tego 2001** is approved under Diseases of Animals Order

**Tego 2001** is retailer approved for use in high care food production factories when used at 1%

## **JohnsonDiversey Tego 2001**

### **Microbiological data**

**Tego 2001** has been extensively tested using the BS EN 1276 Bactericidal Suspension test at 10°C and the prEN 1650. Fungicidal Activity Suspension Test at 20°C. These have shown **Tego 2001** to have a broad spectrum of activity against both Gram-positive and Gram-negative bacteria, yeast's and fungi.
