

JohnsonDiversey Shureclean

Foaming cleaner for manual use

VK10

Description

Shureclean is a high foaming liquid detergent designed for general-purpose application in the food, beverage and dairy industries.

Key properties

Shureclean contains a blend of high foaming detergents and emulsifiers. Its balanced neutral formulation provides an effective cleaning action without the need for harsh alkalinity or hazardous solvents. It can be used on most types of surfaces including plastics and soft metals such as aluminium.

Shureclean is recommended for manual and soak cleaning of all food preparation equipment, cooking vessels and utensils. It can also be used for cleaning floors, walls and work surfaces.

Shureclean is high foaming and free rinsing. It is suitable for manual application with a cloth, brush or spray applicator and also for soak tank cleaning. It can also be used as a foam additive with dual foam applicator equipment.

Benefits

- Versatile and economical
- Effective cleaner
- Suitable for manual use
- Suitable for soft or hard water
- Non-perfumed product

Use instructions

Use **Shureclean** at concentrations between 0.5-5% v/v depending on type and degree of soiling. For specific details please refer to individual method cards.

Technical data

Appearance	clear, colourless liquid
Relative Density at 20°C	1.03
pH (1% Solution at 20°C)	neutral
Chemical Oxygen Demand (COD)	197 gO ₂ /kg
Nitrogen Content (N)	9.1 g/kg
Phosphorous Content (P)	none

The above data is typical of normal production and should not be taken as a specification.

Safe handling and storage information

Store in original closed containers or (where applicable) in an approved bulk tank, away from extremes of temperatures. Full guidance on the handling and disposal of this product is provided in a separate Material Safety Data Sheet.

Product compatibility

Shureclean when applied at the recommended concentration and temperature is safe for use on materials commonly found in the processed food industry.

Always rinse surfaces thoroughly after use (within 1 hour).

In the event of uncertainty it is advisable to evaluate individual materials before any prolonged use.
